Academic Program and Course Description Guide

2026

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

7- Research and reports:throughResearch, data collection and analysis skills.	

Skills

<p>Skills learning outcomes include a set of abilities and skills that students are expected to acquire during their studies. Among these outputs:</p> <ol style="list-style-type: none"> 1- Preparing an elite group of students capable of creativity and excellence in meeting the needs of society and solving valuable administrative forms Economics and administrative decision-making in areas of specialization. 2- Strategic Planning: Developing the ability to develop strategic plans and implement them effectively to achieve goals Planned organizations. 3- Legal and ethical skills:throughUnderstand the laws and regulations related to business management. 4- Entrepreneurship skills:throughThe ability to develop new ideas and turn them into successful projects. 5- Strategic planning and risk management skillsand Developing creative and innovative thinking skills. 	<p>Learning outcome outcomes include a range of capabilities that students are expected to achieve after completing the programme. Among these results:</p> <ol style="list-style-type: none"> 1-Leadership and management skills: The ability to lead work teams and motivate individuals to achieve common goals. 2-Communication skills:throughAbility to communicate effectively orally and in writing. 3-Analytical skills: The ability to analyze data and information to make decisions based on facts. 4- Financial skills: To provide students with the skills of financial analysis and making informed financial decisions.toProblem solving. 5- Technical skills: Familiarity with applications and programs used in business management, such asMicrosoft Office and ERP software. <p>Marketing skills: Understand the basics of marketing and market strategies, andThe ability to develop effective marketing plans.</p>
--	--

Ethics

<p>The learning outcomes related to values include a set of moral principles and values that students are expected to acquire during their studies. Among these outcomes are:</p> <ol style="list-style-type: none"> 1- The ability to provide Iraqi culture and administrative thought with conscious mentalities that contribute to absorbing intellectual diversity in a way that serves the contemporary Iraqi reality. 2- The ability to continuously improve and carry out social responsibility for the public, private and service sectors. 3- Promote commitment to integrity and professional ethics in all business management activities. 4- Promoting awareness of social responsibility and the importance of community service. 	<p>Values-related learning outcomes include a set of outcomes that students are expected to achieve after completing the programme.</p> <p>Among these results:</p> <ol style="list-style-type: none"> 1- Social responsibility: The student's ability to understand the importance of social responsibilityadministrationBusiness 2-Professional ethics: Promoting ethical and professional values, which helps students take...thedecisionsAdministrative includingIn line with ethical standards. 3-Respect diversity: Understand the value of diversity and inclusion in work environments and treat all individuals with respect and equality. 4-Compliance with laws and regulations: Reinforcing the importance of adhering to laws
--	--

and regulations, ensuring that institutions operate legally and ethically.
Justice: Strengthening the concept of justice in...TFemale workers.

8. Teaching and Learning Strategies

1– Educational needs analysis:

- Determine the objectives of the educational program: by reviewing the vision and mission of the department to determine the educational objectives.
- Labor Market Analysis: Study and understand the needs of the local and international labor market to ensure that the skills taught are aligned With these needs.
- Evaluating current resources: Work on assessing current capabilities in terms of faculty, infrastructure, and available technology.

2–Curriculum design:

- Curriculum development: Design comprehensive curricula that include theoretical and practical materials covering topics such as resource management Human resources, financial management, strategic management, and marketing management.
- Updating and reviewing curricula: Ensuring that curricula remain up to date with modern changes in the field of business administration.
- Incorporating modern technology: Using modern technology such as administrative software and graphical analyzes to enhance the educational process.

3–Teaching strategies:

- Interactive education: Using interactive education methods such as group discussions, problem solving, and case studies.
- E–learning: Promoting e–learning through online learning platforms and virtual classrooms.

- Project-based learning: Encouraging students to participate in practical projects related to business management topics.

4- Developing educational staff:

- Continuous training for the teaching staff: Organizing training courses and workshops to improve the teaching staff's skills in techniques Modern education.
- Encouraging scientific research: supporting faculty members in conducting research and publishing it in prestigious scientific journals.

5- Evaluation and measurement:

- Evaluating students' performance Through various assessment methods, including examinations, presentations, and projects.
- Evaluation of curricula and programs: Conducting periodic evaluation of programs and curricula to ensure their quality and suitability.
- Student and alumni surveys: Collect the opinions of students and alumni to improve the educational process.

6- Partnerships and collaboration

- Cooperation with the private sector: establishing partnerships with companies and government institutions to obtain training and employment opportunities For students.
- International cooperation: academic exchange with international universities to enhance knowledge and cultural exchange.

7- Student support

- Academic and psychological support: Providing academic and psychological support services for students to ensure their success.
- Extracurricular activities: Organizing activities and events that contribute to developing students' personal and professional skills.

9. Evaluation methods

- 1- Daily Quizzes and Final Quizzes: Quizzes are given at the end of each module or at the end of the semester To evaluate students' understanding of materials and the extent to which they achieve educational objectives.
- 2- Reports: Students can be assigned to complete reports related to course topics, allowing them to apply the concepts and skills they have provided They acquired it during the program.
- 3- Active Participation: Active participation of students in class sessions, group discussions, etc. can be evaluatednClass activities.
- 4- Continuous Assessment: Assessment and feedback are provided continuously throughout the semester, allowing students to make grades identify strengths and weaknesses and work to improve their performance immediately.

Professional Development

Mentoring new faculty members

Orienting new faculty members

- 1- Guidance on the necessity of adopting modern methods by employing contemporary methods and using modern technology and modern learning tools and means in delivering scientific material to students and using multiple different tools to evaluate students such as final exams. Monthly, daily, seminars, brainstorming and discussions.
- 2- Designing a training program by organizing training workshops covering the areas of curriculum design and teaching strategies
Using technology in education and evaluating students.
- 3- Training in academic research through training courses on how to conduct academic research and write research papers And publishing in scientific journals.
- 4- Develop effective communication skills with students, coworkers, and classroom management.
- 5- Encouraging participation in community activities by organizing opportunities for new faculty members to participate in activities and services community to enhance their connection to the local community.

Professional development of faculty members

- 1- Using learner-centered teaching strategies.
- 2- Developing academic, research and service processes and outputs.
- 3- Introducing the faculty member to developments in his field of specialization

11. Acceptance Criterion

- Central admission by the Ministry of Higher Education for graduates of preparatory studies in its scientific and literary branches and graduates of preparatory school Commerce (specialization in management).
- Parallel acceptance channel.

12. The most important sources of information about the program

- Corresponding departments in local, regional and international colleges.
- Student guide for central admission prepared by the Ministry of Higher Education and Scientific Research.
- The website of the university, college and department.
- Approved resources available in the Free Education module Scopus – Google scholar– Research Get scholar's website – library College of Administration and Economics.

13. Program Development Plan

Relying on modern sources that enhance the theoretical aspect of the subject and linking it to field reality, and developing the curriculum annually Compatible with university education.

Attending a traditional class (in-person)

18. Number of study hours (total)/number of units (total)

45/3

19. Name of the course administrator (If more than one name is mentioned)

Name: M. Alaa Yahya Younis Saeed Email: alaa.yahia@aliraqia.edu.iq

20. Course objectives

Behavioral goals:

- Ability to apply accounting principles.
- The ability to correct accounting errors.
- Knowledge of accounting methods and methods.

General goal: Understand and learn accounting principles and how to use them in practical life.

21. Teaching and learning strategies

Learning strategies (used by students)

- memory
- Take notes
- Summing up
- Focus on the important parts
- Practice

Teaching strategies (used by the teacher)

- Discussions
- Brainstorming
- Partition to Groups (cooperative learning)
- Concept maps

22. Course structure

Evaluation method	Learning method	Name of the unit or topic	Required learning outcomes	Watches	week
-------------------	-----------------	---------------------------	----------------------------	---------	------

Oral exams	Discussion and dialogue	-Article overview Accounting principles: definition, tasks, development of accounting principles	Understand and understand the concept of accounting and its tasks	3	1
Posts with a semester exam	Lecture with case studies and individual and group discussions	The objectives of accounting principles and the parties that benefit from them, such as: management, investors, suppliers, government agencies, financial analysts...and others.	Understanding and comprehending the objectives of accounting principles and the entities that benefit from them	3	2
Posts with a semester exam	Lecture with case studies and individual and group discussions	Basis for recording financial operations: First: The budget method as a basis for recording accounting operations.	Understanding and comprehending the foundations of recording financial transactions	3	3
Posts with daily testing	Lecture with case studies and individual and group discussions	Second: The accounting entry method for recording financial transactions: the single entry theory. Double entry theory, which is the most widely used and common method.	Understanding and comprehending the accounting entry method for recording financial transactions	3	4
Posts with a semester exam	Lecture with case studies and individual and group discussions	Third: Accounting records: 1: A daily record, in which all financial transactions that occur in the company during the	Understand how to record in a journal	3	5

		fiscal year and their dates are recorded.			
Posts with daily testing	Lecture with case studies and individual and group discussions	2: Ledger record: In this record, the functions of posting and balancing are performed for each account that appears in the journal.-Risks associated with stocks	Understand and understand how to register in the ledger associated with stocks	3	6
Posts with a semester exam	Lecture with case studies and individual and group discussions	Financing financial operations: financial operations related to capital, financial operations related to personal withdrawals, financial operations related to loans.	Understanding and comprehending financial operations	3	7
		Monthly test (first)	a test	3	8
Posts with a semester exam	Lecture with case studies and individual and group discussions	Capital financial operations: These are the operations related to buying, selling, and exchanging fixed assets that the organization acquires to benefit from them for the long term.	Understanding and comprehending the processes related to buying, selling and replacing fixed assets	3	9
Posts with daily testing	Lecture with case studies and individual and group discussions	Revenue operations: Revenue operations related to the purchasing function as well as purchase returns. Revenue operations related to the selling function as well as sales returns.	Understanding and comprehending the revenue operations related to buying and selling, as well as returns	3	10

Posts with a semester exam	Lecture with case studies and individual and group discussions	Revenue operations related to the management function, including expenses and revenues that help facilitate the facility's activities of buying and selling.	Understanding and comprehending the revenue processes related to the management function	3	11
Posts with daily testing	Lecture with case studies and individual and group discussions	Accounting treatment of discount: It includes trade discount, cash discount and quantity discount.	Understanding and comprehending the accounting treatment of all types of discounts	3	12
Posts with a semester exam	Lecture with case studies and individual and group discussions	Accounting treatment of checks: processing incoming checks, processing checks issued by the facility.	Understand and comprehend the accounting treatment of checks	3	13
Posts with a semester exam	Lecture with case studies and individual and group discussions	Processing commercial papers: notes receivable, notes payable.	Understanding and comprehending the processing of commercial papers	3	14
		Monthly test (second)	a test	3	15

176. Name of the course administrator (If more than one name is mentioned)

Name: Dr. Amna Abdel Karim Mahdi
Email: Amenah.a.mahdi@aliraqia.edu.iq

177. Course objectives

Behavioral goals:

- Shedding light on the issues of organizational behavior, in particular the individual and collective behavior of employees, in order to understand the behavior of employees and how management deals with them.
- An attempt to link the theoretical framework of organizational behavior to the organizational reality in the Iraqi environment by simulating what happens in reality through some case studies and observations.

Overall goal: Providing students with a theoretical framework for the development of organizational behavior and its theories.

178. Teaching and learning strategies

Learning strategies (used by students)

- memory
- Take notes
- Summing up
- Focus on the important parts
- Practice
- Listening skills.
- Groupthink.

Teaching strategies (used by the teacher)

- Discussions
- Knowledge and understanding
- Brainstorming
- Case studies
- Partition to Groups (cooperative learning)
- Concept maps

2026-2025

259. Date this was prepared Description

1/9/2025

260. Attendance forms available

Attending a traditional class (in-person)

261. Number of study hours (total)/number of units (total)

30/ 2

262. Name of the course administrator (If more than one name is mentioned)

the name: Mr. Dr. Khalidiya Mustafa Atta Email.kalda@mail.com d2018

263. Course objectives

Behavioral goals:

- A1– That the learner understands and recognizes the principles of strategic thinking and their application areas**
- A2– That the learner understands the features of strategic thinking.**
- A3– That the learner understands the ten steps of strategic thinking.**
- A4– That the learner understands strategic thinking techniques, scenarios, scenario purposes, and steps for preparing and building scenarios**
- A5– That the learner understands strategic thinking skills.**
- A6– That the learner understands the competencies of strategic thinking.**
- A7– That the learner recognizes models of strategic thinking.**
- A8– The learner understands how to analyze external and internal environmental factors and work with the SWAT matrix.**

1-Learning about the subject of strategic thinking, its importance and its applied practice as an “intellectual” approach characterized by modern leadership and an inevitable necessity in the progress of organizations regardless of their activities.

2- Introducing students to the characteristics of strategic thinking as it is one of the important topics in management science. 3- Enhancing students' abilities to analyze the elements of strategic thinking, its external and internal environmental factors, strengths, weaknesses, opportunities and threats.

4- Enhancing students' abilities to understand the purposes of strategic thinking to meet future needs.

5- Introducing students to the importance of strategic thinking and its benefits.

6- Introducing students to the principles of strategic thinking and the ten steps for practicing it.

264. Teaching and learning strategies

Learning strategies (used by students)

- memory
- Take notes
- Summing up
- Focus on the important parts
- Practice

Teaching strategies (used by the teacher)

- Discussions
- Brainstorming
- Divide into groups (cooperative learning)
- Concept maps
